CULTURE

Gladiolus are easily grown in any well drained sunny location. Plant bulbs 3 to 4 inches deep and apart from other perennials or shrubs for best results. Most effective in specimen groups of 6 to 12 or in solid beds or borders planted like tulips or daffodils. If cut flowers are desired be sure to leave 3 or 4 leaves for bulb production. Planting may be done any time after danger of freezing is past in spring until early June with equally good results.

TIME OF SHIPMENT

We can supply gladiolus any time from February 1st to June 1st. For our Southern customers we recommend February delivery, and for the rest of the country April or early May is generally most satisfactory. We try in all cases to ship at the best planting time for your locality unless you specify shipping date.
